

Off-Grid Solution - Weather Monitoring Systems

Completed project

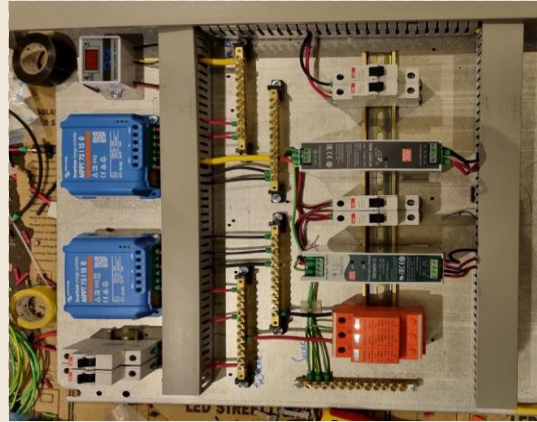

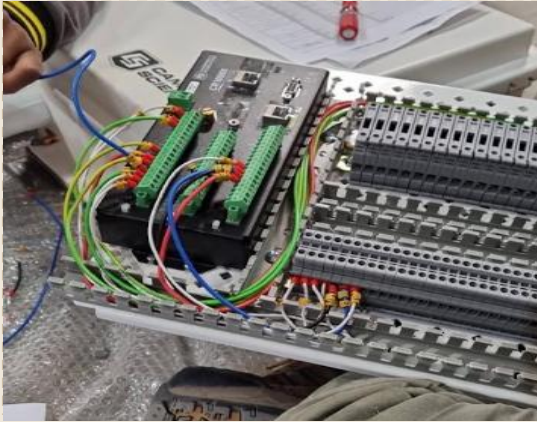

PROJECT DESCRIPTION

Implemented a stand-alone solar energy solution for weather monitoring systems, providing dependable power to remote sensing, data acquisition, communication, and monitoring equipment.

KEY FACTS

Capacity	-
Location	Saudi Arabia
Scope	Turnkey EPC
Status	Completed

Off-Grid Solution - Weather Monitoring Systems Images & delivery notes

DELIVERY NOTES

Successfully delivered a reliable off-grid power system incorporating solar PV, battery storage, charge control, and power distribution, enabling continuous operation in remote locations.
