

Solar Traffic Monitoring System

Completed project

PROJECT DESCRIPTION

Developed a solar-powered traffic monitoring solution for remote and infrastructure locations where conventional grid power is unavailable or impractical. The system provides autonomous power for traffic monitoring and associated communication equipment.

KEY FACTS

Capacity	-
Location	Saudi Arabia
Scope	Turnkey EPC
Status	Completed

Solar Traffic Monitoring System

Images & delivery notes

DELIVERY NOTES

Successfully delivered an integrated renewable-energy solution combining solar PV, energy storage, power management, and monitoring equipment, enabling reliable 24/7 operation.
