

# Off-Grid Solar Container for EV Vehicles (BESS)

Completed project

## PROJECT DESCRIPTION

*Designed and delivered an off-grid solar container solution supporting electric vehicle (EV) applications, integrating renewable energy generation and energy storage to provide an independent power source for EV charging infrastructure.*

## KEY FACTS

|          |              |
|----------|--------------|
| Capacity | -            |
| Location | Saudi Arabia |
| Scope    | Turnkey EPC  |
| Status   | Completed    |

Images & delivery notes

## DELIVERY NOTES

*Delivered a complete and scalable solar-powered energy system, providing clean, independent power for EV applications while reducing reliance on conventional grid infrastructure.*
